***Response to Amendment***

1. Applicant's amendment filed 07/26/2005 has been entered and carefully considered.

Claims 1-3, and 13 have been cancelled.

Claim 12 has been amended.

***Reasons for Allowance***

2. Claims 4-14 are allowed.
3. The following is a statement of reasons for the indication of allowable subject matter:

Please see the previous office action and applicant's argument filed on 07/26/2005 and 05/03/2005.

Regarding claim 4, none of the prior art of record teaches or suggests the combination of a method for detecting bearing anomalies in machinery, wherein the method comprises performing at each of a plurality of times the steps of: constructing a condition signature from a plurality of condition indicators; predicting a normal signature corresponding to the condition signature for the machinery without bearing anomalies; comparing the condition signature with the normal signature; and registering a bearing anomaly if the condition signature differs from the normal signature by more than a predetermined threshold. It is these limitations as they are claimed in the combination with other limitations of claim, which have not been found, taught or suggested in the prior art of record, that make these claims allowable over the prior art.

Regarding claim 14, none of the prior art of record teaches or suggests the combination of a data processing system for detecting bearing anomalies in machinery, comprising: data acquisition devices for acquiring a plurality of condition indicators from the machinery at each of a plurality of times; a processor for constructing a condition signature from said vibration measurements and for predicting a normal signature corresponding to the condition signature for the machinery without bearing anomalies; a comparator for comparing the condition signature with the normal signature; and a register for registering a bearing anomaly if the comparator indicates that the condition signature differs from the normal signature by more than a predetermined threshold. It is these limitations as they are claimed in the combination with other limitations of claim, which have not been found, taught or suggested in the prior art of record, that make these claims allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
